SHURTLEFF PLAN PUTS COURT IN MILK BUSINESS

Would Use PMA Ideas Plus Law Strong-Arm for His Co-operative

Besides borrowing the essential Ideas upon which the Pure Milk Assoclatten is founded, Judge E. D. Shurt-Jeff, in attempting to form n milk marketing cooperative with a nucleus of former disgruntled PMA members who dropped out of the association during the Octobor milk strike, wanta to luject the circuit court into the milk business.

This is revealed by the circuit judge in commenting on the recent meeting of district eight of the PMA.

"I would bandle it (the muk marketing organization) as a trust and through an equity court proceeding and would name three trustees. Every fanmer's contract should he a conveyance to trustees to handle, soll, condition, deliver and to account and under this, everything could be deno that the PMA new does hat by order Antioch Firemen

of court." Would Control Producer Judge Shurtleff indicated that by using the law enforcing agencies at the circuit court's control, a milk preducer with the circuit judge deliberating over his milk contract "would Lo compelled to deliver his milk by tho

Shurtleff states. this plan "should not be controlled tention of the Red Cross to breaden Gaggin of Chicago, and a granddaughby politics and every producer should have similar and identical roice in fire departments life saving and first everything that is done."

In his plan Judge Shurtlest would place a circuit judge at the head of (Continued on Page 8)

ILLINOIS COUNTIES ARE RE-ACCREDITED FOR TUBERCULOSIS

Bovine TB Less than 1/2 of 1 Percent in Lake County

Illinois may point with pride to the efforts put forth by the Department help in the elimination of this droaded menaco to human health. Mors than 3,600,000 cattle have heon TB tested in Illinois during the past two

All counties in Illinois were declared modified accredited tuberculosisfree for the first time September 1, 1934. Since that date the State testers have continued their hattle against diseased cattle, and Illinois was reaccredited in 1935. This of course means that bovino tuberculosis the childhood typs of tuberculosis. has been reduced to less than one-half of one per cent in Lake county and diagnesis. Two other children were every other county in the state.

Testa completed in Crawford and Monroe countles the first week in January show only a small percentage four others were examined in addition of reactors. Two reactors were found to the ones listed abovu. among the 15,000 cattle tested in Crawford county for a percentage of .01. In Monroe county the percontage people all over Lake County have was higher with 19 reactors among

8,300 tosted cattle. Tosting for Bang's disease, commonly known as contagious or infectious abortion, is making rapid progress in lilinois through the cooperation of the state and federal government under the Jones-Connolly Bill. More than 126,000 cattle have been tested with the reactors averaging money is available for clinics and the 14-9 percent.

Approxiately 5,000 hords are nader atato and federal supervision. Any Lako county dariyman wishing to bave bis hord tested for Bangs disease ahould write either to Dr. J. J. Lintner, 999 Exchange Avenue, Union Stock Yards, Chicago, or the State Department of Agriculture, Spring. field, Illinois, for full particulars.

HOLD FUNERAL FOR MRS. A. J. FELTER MONDAY AFTERNOON

Community Mourns Passing of Useful Life; Born 1857

Funeral services for Mrs. Adison J. Felter, who passed away last Thursday following a week's illness of pneumonis, were held Monday after noon at two o'cleck from Strang's feneral home and interment was in Hillside cometery. The service, first announced for Saturday, was post pened on account of the severe snow storm of Friday night.

The service was in charge of Rev. L. V. Sitler, pastor of the First Methodist church of Antioch. Fred Yates sang two songs. Pall hearers were Lester Crandall, Herman Cubbon, Ernest Simons, Roy Kulalk, Clarence Shultis, and Frank Spangaard.

Mrs. Felter, before her marriage was Margaret Ellon Gaggin, the daughter of Thomas and Nora Gaggin, and she was born August 7, 1867, in Franklin, Ohio. While yet a small child she came with her parents to Salom, Wis., and sho resided in this community the remainder of her life.

She was married to Adison J. Felter, one of the youngest of the country's civil war veteraits, February 22, 1883, and the couple lived in this immediate vicinity for over half a cen-

No School Friday; Dance Is Postponed, Exams Due Monday

Weather conditions, making it inadvisable to travel to and frem school, have closed the doers of the school houses throughout the community.

Students of the Antioch Township high school got a reprieve on their examinations which were scheduled for today and Friday because school has been closed. The exams, however, will be held on the regular schedule on Monday and Tuesday. The dance which was dated for Saturday at the high school has likewice been postpened. The basketball game scheduled for Friday night will be played unless called off later.

SAVES OF WILMOT WOMAN

Barking Brings Aid After Mrs. Harms Collapses in Snow Drift

Mrs. Mary Madden Harms, 35, about." widely knewn resident of Wilmet and vicinity, narrowly escaped denth by freezing Saturday night, when she matter to direct motorists to Anticela fell, exhausted, while attempting to and the Lakes Region by saying: walk home after an automobils lo "Take Route 21 (Milwankee ave.) out snow drifts.

Only the barking of a dog saved her life. She was found, half buried in he recovering satisfactorily.

Sam Haldeman, a farmer residing in Illinois, south of Wilmot, discovored the freezing woman lying in his yard when he went to inventigate the cause of his dog'e continuous barking. Mrs. Harms and walked a mile and Secretary of State to find out "why half, battling her way through buge Antloch was not included on the read irifts that completely blocked the drifts that completely blocked the highway south of Wilmot, before she collapsed. Apparently, she had seen the Haldeman farm house, only a half mile from her own home, and had

turned into the yard before falling. Sho had been in Weodstock during the day and had hired an automobile to drive her home, starting the trip in spite of snow clogged highways. The to attempt to walk the two miles to

her home. Mrs. Harms was kept at the Halde man home until the next day and first ald treatment administered. Present reports are that she has completely rocovered from her harowing expel-

GENERAL ASSEMBLY MAY ABOLISH IERC

Lyons' Bill May Pass House to Put Relief Administration on Counties.

Libertyville Republican, who has placed a hill before the general assembly to abolish the Illinois Emergency Relief Commission and throw the administration of roller back on the varlous counties, may see his measure passed by the house.

Members of both parties yesterday declared themselves willing to abolish the IERC, but dispute arose as to whether they will support the Lyons' cludes the drop in the returns from bill or one proposed by F. W. Lewis,

Lewis in his bill to eliminate the commission, proposed a cent and a half of the sales tax to go for relief. the money to he distributed by a board of three state officials. Lyons' become effective March 1, will speak measure would not alter the one cent allotment for relief purposes and pro-

Passage of either bill, it is believed would eliminate the expense of maintaining the IERC payroll because rellef in the counties would be administrated by agencies already in existence. Local administrators in the countles would be able to administer rellef more effectively and probably

DANCE POSTPONED The dance at Oakland School, east

of Loon Lake, will be postponed until Friday, January 31.

CLUB TO SEEK RT. 21 NAME

Boyles Is Dinner Speaker; Appoint Committee to Get Original Road Number

In addition to hearing John Logan Beyles, Wankegan attorney, defina Utoplanism, members of the Antiech Men's club unanimously approved a resolution at their meeting Monday night in Antiers Hotel to request the State Dopartment of Public Highways to call the main highway through Antloch hy its original name of Route 21. A committee composed of Horh Vos, Einar Sorenson and Otto Kinss was named to bring the matter before the proper authorities at Springfield.

Burlington Men Approve The discussion and action of the Men's club was brought to a vote following a request by a delegation of husiness men from Burlington, Wis. It was pointed out that the state routo has been named and renamed so many times during the past year that tourists do not know "what It's alt

In the past with the highway designated as Route 21, It was a simple which she had been riding stalled in of Chleago and directly into Antioch." With the present confused designatiens a motorist, vin the same route, must take Route 21 to the intersection with the River Road south of legs badly frozen. She is reported to Wheeling, then Route 45 north to a ortyville where it intersects with Route 54 and thence north into Grays-

lake and on to Antioch. Why Omlt Antloch? In addition to the route numbering, the committee intends to contact the 1936 automobile license plates. The map does not mention Antioch and is

cut so that it misses the community by about two miles. In his entertaining address, Mr. Boyles, who was a recent candidate on the county Republican ticket for produte judge, pointed out that even "if we had ruo Utopia, it wouldn't work unless people changed their personal attitudes toward their fellowmen, because then we would not have

Utopia.". "Share the Wealth" He explained that the "share the wealth" idea, on a Utopian hasis, does not mean the "sharing of money," but the "sharing of goods and labor"

which "is the country's wealth." History reveals, Mr. Boyles said, that depressions made people listen to spellbinders with share the wealth and other Utoplan plans. People do not have to look any place or listen to elaborate schemes to share money. he pointed out, because if they have the true Utopian ideals they can "look about them and give their fellowmen ald" without "thinking too much of themselves and where they ilt into the Utopian picture."

Ropresentative Richard J. Lyons, District PMA Holds Annual Meeting at Ela School Jan. 25

The postponed annual meeting of district seven of the Pure Milk Association will be held Saturday afternoon, January 25, starting at 1 o'clock, in the Ela Township high school of Lake Zurich, it is announced today by C. W. Wray of Grayslake, secretary of the district.

In addition to the election of officers of the district group, Den N. Geyer, manager of the PMA, who announced his resignation last week to on the association's activities during the past year. The meeting is for vide: disbursement by a hoard of five members of the PMA and their familles only, the announcements states,

New Theatrical Company Plans Debut at Fox Lake

Organization of a new theatrical steck company here was announced this week by William Nelson and Homer LaPlant, who have arranged to present their initial performance at the Grant Community High school January 30 and 31. Their first play is "Cuptain Applejack," n sen story of pirates and hidden treasure, which requires a cast of 11 players. Nino more will appear as musicians and in specialties between acts.

The organizers will call their company the Crystal Players, and they The only thing that can save Uncle plan to stage high class plays throughout this locality.

ADVERTISING REPRESENTS

EMPLOYMENT AND WAGES No private enterprise has a greater interest in industrial development and business expansion than the newspapers. By the same token, no private enterprise suffers greater harm when industry is taxed, regulated or regimented to the point of inertia.

The invention and expansion of the automobile industry, for example, with its related businesses such as tires, gasoline, repair shops, etc., created the greatest single advertising account of all time.

Newspaper revenue is ofren imperiled by radical and destructive political attacks on industries. The ruthless use of the weapon of taxation is potent in discouraging

future advertising accounts. In addition to staggering general taxes, many industries are now penalized with additional class or special taxes which cut deep into the operating revenue-for example, witness the purely class taxation of utility companies, insurance companies, retail stores, etc. It often happens that it is impossible to cut expenses materially in any other direction than advertising.

Advertising represents business for everybody. Lack of advertising shows lack of business with resulting

lost jobs and lost earning power by the nation. The estimated volume of local newspaper advertising, including classified, in 1929, reached a peak of \$600,000,000. From this point it dropped to a low of \$325,000,000 in 1933, and unemployment was the illustrate the newspapers' interest in future economic, political, taxation and industrial policies which encour- salaries.

Newspapers are one of the first industries to suffer from campaigns which cripple or destroy any business. Therefore, they should be most zealous in guarding their own as well as the public interest against demagogic, class or punitive attacks on any business or industry.

THE ONLY THREE

appears quite inadvertently in an engagement book is- cerely made, is the result of misunderstanding of what sued by the New York Telephone Company. It presents the name of speed record holders in three fields, as

Air- Liutenant Francesco Agello of Italy 440.29 mph. Water-Warfield A. Wood of the United States

124.86 mph. Land-Sir Malcolm Campbell of England

301.337 niph. What a blow this must be to the thousands of amateur speeders throughout the country! The only places

of Casualty and Surety Underwriters, that 6,850 persons were killed and, 134,300 injured in automobile accidents during 1934 as the direct result of excessive speed. But the statistics cannot show how important a factor speed was in nearly every other cause on the motor accident calendar. Driving cars too fast for conditions played a prominent part in thousands of accidents charged to violation the right of way, cutting in, passing a standing street car, passing on a curve or hill, driving off the road

way, and reckless driving. The smart, twenteth-century attitude on speed is that it is no longer a question of how fast you can go, but of how fast you can stop.

Remember that excessive speed is relatively so insignificant that out of the whole world only three names are given any mention for it.

"MEDICINE-MAN" ECONOMISTS

In a recent address, Charles R. Gay, President of the New York Stock Exchange, paid his respects to economic cure-alls and self-appointed prophets.

to supply power for the economic machine," and that From an address by Roy H. Faulkner, President, Auburn insofar as the state's contribution to prosperity touches economics, it will lie in "equitable taxation, the wise regulation of monepoly and unfair competition, and a sound currency and credit system.

"The government will need expert counsel in these matters," he continued. "Here the economists of true and penetrating vision can function when the 'new' eco nomics of the depressions has had its day, completed its experiments and retired—to compute the cost.

"In times of doobt and distress there are always new plausible prophets who find a hearing by announcing they have discovered a cure for the troubles which afflict

"The itinerant medicine man used to sell his nostrums for \$1 a bottle, with a guarantee that it would cure headaches, chillblains, or any other ache or pain. He gained his following because of the public's ignorance and desire for a quick remedy, and I suspect that the same human weaknesses account for the pupularity of today's economic care-alls.

With the gradual return of better times, these prophets will slowly sink back into obscurity. I think I can detect signs of their approaching eclipse."

PEOPLE AGAINST FRANKENSTEIN MENACE

Observers of press comment and public opinion throughout the nation are forcibly impressed with two facts: First, the desire of the people to maintain the neutrality of this nation and avoid war and foreign entanglements, and, second, the growing demand for balanced budgets and reduced taxation.

Congressmen who have just returned to Washington after some months at home among their constituents, day. have felt this sentiment. They know that nothing causes greater worry to millions of citizens-Republicans and Democrats alike—than the soating national debt and the Frankenstein menace of new and higher taxes. They know that the general thinking public is beginning to understand that eventually tax reduction is essential to luncheon. permanent prosperity.

It's a rare Congressman who doesn't keep his ear to the ground, and it's also a tare Congressman who hasn't heard from his constituents that an economy program in Federal government is now desired, and is indispensable to increased employment, industrial expansion, building activity and relief for the land owner.

The trend of public opinion was well demonstrated the general approval of the President's recent statement on neutrality and his expressed belief that new or higher taxes were neither necessary nor desirable.

IT TAKES EGGS FOR OMELETS

Taxes, direct and indirect, will be a little less than \$23,000,000 on the business of a large midwest retail organization for 1935, according to its presi-

These taxes are equivalent to seven times the dividends paid in 1934, five times the 1934 profits, 50 per cent of total operating cost fer 1935, twice the amount cation with her mother and sister of taxes in 1934, and three times the total paid in 1931. He said that industry cannot continue to bear such taxes indefinitely. That is true. Those taxes must be passed on to the consuming public or the industry will go broke

The time is coming when the tax-gatherers are gogreatest on record. Nothing could more graphically ing to have to worry about keeping business alive, if for no other reason than to collect enough to pay their own

The short-sightedness of political tax-boosters who continue to attack the industrial goose that lays all the golden eggs which they scramble in trying out their new economic recipes, would be laughable if it were not so serious to the solvency of the nation.

CO-OPERATIVES VS. SOCIALISM

Some critics of farm cooperatives have denounced lng at the school house on Monday A most ironic "editorial" on the subject of speed them as being socialistic. This criticism, though sin-

> Socialism, roughly defined, involves governmental ownership of productive resources. Thus a socialistic cooperative would be one founded and financed by public money, operated by government agents; with the government treasury standing behind it to pay any losses and to guarantee its members a return no matter how incompetent they were, and no matter what conditions

The real farm cooperatives, by contrast with this, are excellent examples of private initiative and entertheir names may appear is on the police blotter or the prise. A group of farmers will get together, figuring that they can buy more cheaply in larger quantities, or Statistics show, according to the National Bureau that they can sell to better advantage through a strong of Mrs. Gene Sheehan, J., In Autluch central organization. They put up their own money, and take their own risks. If there are profits, they divide them. If there are losses, they absorb them.

This kind of cooperation is not socialism-it is sound business, based on sound economics. Cooperating farmers are individualists, who use the benefits that accrue from mass action to better their individual lots.

THE AMERICAN HERITAGE

"We have become a great nation because we are a nation of fearless individualists. We have no caste, no privileged few; and the little child born in the tenements is a potential president of the United States. This is our heritage. No depression can take away from the true American his desire to climb and his desire to achieve. The history of America is filled with the stories of men who battled their way through barren wilderness, who blasted their way through mountains of rock, and laid the foundations of cities and businesses that stand as testimonials to this country and its opportunities. . . . For the track walker becomes the railroad president, and He said that "the state should refrain from trying the farm boy becomes the president of a great bank." Automobile Company.

ANSWER THESE QUESTIONS

A school of shark-eyed, power-seeking politicians are belittling American ideals of government and constitutional safeguards of liberty.

Shall we continue to encourage the individual to earn profit by his own energy, initiative and thrift before we take it away from him to meet the needs of government, or shall we create conditions where no accumulations of private property will be possible?

Can our free institutions withstand the impact of the aggregated forces of officialism and disintegrating collectivism?

TAXPAYERS BECOME GREATEST EMPLOYERS

According to the United States News, the federal payroll early in 1933 included 2,159,835 persons. By December, 1934, the number had grown to 7,558,228.

And in December, 1935, the total was 9,047,956. These nine million people receive federal pay totaling more than \$5,000,000,000 per year.

SEE

SAW LINCOLN SHOT---

(Continued from page 1). accompanied by Major Rathbone and Miss Harris, bscause General Grant was called away during the day, arrived soon after my brother, his wife

and I had been ushered to our sents. "Tho play, The American Cousin, tenturing Laura Keene, was progressing smoothly, the large audience enjoying every minute and rewarding the performers with well deserved applause. Suddenly I heard a revelver shet. Not having seen the play I imagined it was a part of the perfermance. But that idea was quickly dispelled when Mrs. Lincoln Jumped to her feet, wringing her hands. Then we realized what had happened, the President had been shot, and there was great excitement.

Makes Dramatic Exit

"Before he jumped from the bex in which Mr. Lincoln was seated tho assassin etood in the front opening of the box, making ready to jump for the stage. He had in his hand a bright, new dagger, perhaps fifteen inches long. Majer Rathbone reached for his arm but the assassin struck back and slashed the officer's arm quite badly. He then faced the audionce and waving his daggor said: 'alc semper tyrannia,' and then leaped for the stage. One foot struck the stage but the other missed and he tell into the orchestra pit. He then pulled himself up to the stage, cressed diagonally, and disappeared out the back door where a mounted herae was waiting."

Dr. Ward was born at Batt! Cota, on the Island of Ceylon, and follewing his education, entered into the practice of medicine in Chicago in 1870. He is survived by three daugh tors: Mrs. Careline Blackman of Whitewater, Wis.; Mrs. Frank Stewell of Glancoo; and Miss Elizabeth Ward of Richmond. Funeral services were held in Richmond Monday.

Thinning Benefit to the Wood Lot

Many Treble Stand of Trees and Provide Fuel at the Same Time.

By R. B. CANMENTER, Extension Forester,
Massachusetts Blate College,
WNU Service.

Owners of farm woodlots can trebte: the final value of the stand and at the melee, S. D. same time obtain plenty of fuel wood. The horizon line in the photograph for this winter by following a few is represented by a stratum of hazo almple rules.

The farm wood lot is distinctly an Important part of the farm end is capable of producing a steady income. Careful selection of the trees that go into the wood hox will save many dol! lars to the owner of the wood lot through increased value of the remain-

In a fully stocked forest, the final stand will consist of from 100 to 150 trees to the acre. The mula object of stand improvement is to select on each aere that many trees of the best form and species and develop them for the final crop. Only a amail percentage of stems will ever reach maturity, and it would be a serious mistake to leave only the final number in a growing

Rather the owner should pick out the best species to save, and free them from competition by cutting away a few of the less dealrable species. Don't remove anything more than is necessary to accomplish this result? Limit the work to opening a space around the crown of each tree that will close completely within five years.

In uneven oged stands the valuable species should be released, in land densely atocked with young hardwoods of one to three Inches in diameter, se lective thinning will promote sound timber production.

Cutting out all dead, defective, and dying trees and those of inferior speclea la advised. If the work la carefully planned and executed, the wood let will grow surprisingly.

Screw Worms Reach Corn

Belt; Winter Kills Them

The screw worm, one of the most destructive pests of live stock, at tacked animais this year in several northern states. Strong flyers, though they are these Insects could never have traveled under their own power so far from the South, where they enuse heavy losaca among all classes of live stock, according to Dr. F. C. Bishopp of the bureaus of entomology and plant quarantine, United States Department of Agriculture, Apparent. ly, Doctor Blattopp anys, the pest. h lts meggot stage, was carried on the fested cattle and sheep shipped North in response to the stimulation of rislog ment prices and abundant feed in the corn belt. In this new territory It sprend in 14 countles in central western Illinois, in eastern Missouri, and in southwestern lown. There have been more than 7,000 acrew worm cases in Illinois and the peat killed about

400 animala there. Cold niwnya checks the acrew worm. even in the South. As the lly is southern species, it is not likely to survive the winter in the corn beit. An outhreak next year, therefore, need be feared only if infeated unlimits are allowed to come le.

PHOTOGRAPHS SHOW EARTH'S CURVATURE

Stratosphere Flight Films Dairyman Is Advised to Use Interest Science.

Washington.-Striking pictures from high in the stratosphere, showing the earth's actual curvature on the harlzon more clearly than ever before, and revealing how the world looks from the greatest height at which photographs ever have been made, have just been developed from films exposed during the recent stratosphere flight of the National Geographic society-Army Air corps balloon, Explorer II.

The photographs were shown for the first time in connection with ceremenles at which Capt. Albert W. Stevens, commander of the balloon, and Capt. Orvil A. Anderson, its pilot, received Habbard Gold Medals, highest award of the National Geographic society, lu Washington,

The photographs were taken by Captain Stevens while the Explorer II, was at its "ceiling," 72,305 feet ahove South Dakota, a new world altitude record. He showed them during a lecture describing the flight following the presentation of the medals.

Covera 220 mile Stratch.

The picture showing the interal curvature of the earth Includes a stretch of the horizon 220 miles in length. This represents more than three degrees of a circle-nearly 1/100th of the total elecumference of the earth. The curve of the harlzon is easily noticeable when the picture is projected on a screen-photographic evidence that the world is round. When the edge of a culer la lald along the horizon the curvature is even more plainly visible.

In taking this picture the camera used by Captala Stevens "saw" a distence of approximately 300 miles, for heyond the range of the human eye. The herizon showing to the photograph is estimated to have been at that allsinnce from the camera. The photograph was taken by infra-red light which is capable of piercing distant haze. All of the other colors of sunlight are shut out of the camera by a red filter in making this kind of long-distance photograph.

The picture shows a vust stretch of western South Dakota, covering mare than 33,000 square miles. The Black Ililia, from which the flight started and which have an area of about 6,000 square infles, appear as a large dark aren at one side of the picture 160 miles in the background. The picture was taken frem a position above Par-

above the earth. This stratum of haze, however, coaforms closely to the sea level surface of the earth and its curvature reflects accurately the curvoture of the earth itself.

Rivers Like Delicate Tracery. Both still and motion pictures taken directly downward from the stratesphere balloon while it was ut its celling of 72,395 feet; the highest-altitude pictures of the earth ever taken, als were allown by Captuln Stevens. They reveal the earth as a huge plate marked with tiny cheekerboard-like forms and fields. Cutting late the level, smooth farm hands are regions ef eresion, with innumerable small atream courses, arroyos and creek beds, forming intriente patterns of delicate trucery like frost on a window pane. Roads appear as thin, kalfe edge lines. Towns are practically invisible.

"Tattling" Cat Is Pet

at Prison in California Felsom Prison, Culif.-Felsom prison's pets itre becoming almost as well knewn as seme of the lastitution's in-

First there was Itusty, "stool pigeos cat" who still roams the old cell block with more freedom than any one, even the guards. Then came Illne, the bluegray offspring of llusty. And Blue adopted as his constant companion Chirls, a thy-finch which was found deserted in a nest atop the prison wall.

Rusty became famous some ten years ago as the "stool pigeon eat" who unfallingly discovered prisoners when they broke rules by preparing fend in their cells. Now and then a prisoner constructs a critia tonster or olectric stove, secretes it in his cell and soruggles food there from the mess table, with the idea of preparing a snack before turning in for the night.

On auch occasions, Runty may be depended upon to head directly toward the cell from which the aroma of food emnnates, sit outside and meow. Invariably this attracts a guard and the offending prisoner is placed in solitary.

Make Men Bigger Than

Trees on Indian Rugs Sault Sle Marle - Indiana hereabouts are long en art but short en perspective, a study of the designs they work into their heeked rugs on sale in local stores would indicate. Frequently the rugs, sought by tourists because of their occentricities In propertions, have men taller then trees, cannes se small they wendn't support a child but shown carrying twe or three men, and bears of the

alze of elephunts worked into the de-

Sometimes when they get a man finished they don't have room for a blg tree so they just make a small one. "The picture is the thing-not the size," explains "Pets" Vigennt, friend of the Indiana who seeks on outlet for much of their handleraft.

Cooling Milk in Winter Important

Well Insulated Tank and Clean Quarters.

ny Prof. H. J. Brucckner, Dairy Dent., New York State College of Agriculture WNU Service.

A can of milk that stands overnight mny appear to have been cooled prop erly because some of the milk freezes. Slow coaling before it freezes makes an inferior grade of milk, and, in addition, the frozen milk usually stays in the can when the milk is dumped at the nilk plant or station. Hence some of the milk is lost even though it might "get by."

Neither is the setting of milk in snow bank or on a cake of lcc during winter nights a satisfactory way to cool milk. The can on a cake of lee will cool at the bottom and thus will cool the milk in the hottom of the cao. Since the cold milk at the bottom of the can is heavier than the warm milk on top, the cool wilk stays at

the button and the warm milk re-

imlos on top; hence, all the wilk is The can in the snow bunk does not enot because n few minutes after it is placed to the snow bank, the snow against the can inclus and leaves a space that forms good insulation; this reports cooling and almost prevents it. Even in very cold weather, that alr space between the can and the snow is not changed very much by the

o atand in the cold wind than if it is placed on ice or in a snow bank. If all dairymen are to eat down on the amount of milk rejected this whoter and put out a better product, they should cool their milk in a well hisnintell milk tank lo a clean milk house. just the same as during hot weather. Losses to rejected milk cost durymen thousands of dollars each year.

cold nir above. Actually, a can of milk

Warehouse Board Sealers

Rule on Handling Corn Due to the high percentage of mois ture contabled in the coro in some sections, the lown department of ngriculture recently made a ruling that no corn will be sented by the ware house hourd sealers which is a greater distance to p four feet from a slatted side of a crib or a sultable ventilinor As a general rule, it is held that any erlb which is more than eight feet wide and in which the corn is more than eight feet deep, should have a ventilator anless the corn happens to he extremely dry.

Strings of six-lach tile laid every tion to some cases. Vertical ventilators, somewhat resembling chimneys. ean be constructed with two-by-fours about a foot spart each way and connected with one by three slabs. These vertical shafts are sometimes connected up with horizontal strings of tile In addition to equipping the crin with ventilators, saiting also will be of considerable help in preventing mold in cern which centains 30 per cent moisture at eribbing time. One pound of salt for each hundred bushela of corn is the common proportion to use. Two pounds of sait for a hundred bushels is still more effective, but such a heavy application of sait is not wise when the corn is to be fed to live stock, Salting, Incidentally, should always be used in connection with the ventilating device.-Wallaces' Furmer,

\$24,000 on the Hoof

The most striking cattle-feeding story that has come to our onlice lately concerns Joe and Fellx Corpstein of Nortonville, Kan. On May 1, last, says the Country Home, the Corpsteins topped the market with their twenty-first carload of horned Hereford steers. Out of a total of 25 cars sold from January 28 to May 1, only four ears Inited to set the pace for day's run. Nearly all shipments went to the Chicago stockyards. Prices recelved ranged from \$13 to \$16.25.

The Cornsteins would not rate as reterna feedera. It was in 1920 that they began feeding 400 to 500 cattle annually en their 2,000 acre farm la ocder to build up the fertility which grain farming had used up. Their steers fed in the open at banks, filled once dally, and were allowed to eat all they liked. They were started on bren and later fed mostly on enslage, shelled corn, molasses, feed and sifulfa. It is estimated that there was a net cash profit of more than \$50 each on the 417 steers fed this sensuo.

Agricultural Notes A frequent cause of eff-flavor in crenm is rust to the can.

Barnyard manure is not a waste product and should not be wasted.

Far more women leave the farm for the city then men. Today there are 1,421 single men for ecvry 1,000 alogie women on the farms of this country.

The leading Swiss breeds of goats ars the Toggenhurg and the Sannen.

Potatoes can be made to grow sons er and larger by treating the seed with high frequency sound waves

Sheep will drink more water in winter than in aummer, as they do not get the benefit of the dew on the grass.

Community auctions and public atockyerds in thie are regularly laspected by approved veterinarians to prevent spread of live steck diseases.

AMUSEMENTS.

"Averege Men's" Talk

Announcing his findings in the Berlin Illustrictte Nuchtausgabe, Doctor Carle says that his "average man" talks about two hours daily. Reckoned at 100 words per minute, that makes him orticulate no less than 4,500,000 words will cool more quickly if it is allowed in the course of a year.

> Greatest Greek Epigremmetist The greatest Greek epigrammatist was Simonides. The principal Roman epigrammutists were Martial and Juveunl. Bolleau-Despreaux, Voltaire, Slinkespeare, Pope and Osenr Wilds were among the most brilling of the ages.

Origio of Mute Unknown Nabody seems to know when the mute, which is attached to the bridge of a violia to change its tone, was invented. One of the earliest printed scores to call for its use is that of Lully's "Armide."

Room for Improvement "Dey's havin' a heap o' talk," said Uncle Eben, "bout what dey teaches in de school where I junitors. De only comfort I sees is dat a lat o' chillun sin't studylo' enough to learn anything.

Jerked Meet "Jerky" is jerked meat usually venison; that is to say, lean ment cut into strips and dried over a slew fire

News Notes LAKE COUNTY FARM BUREAU

Grayslake, III.

Lake County Debt Adjustment

The Lake County Debt Adjustment Committee will meet on Tuesday, Jan nary 27, at 2:00 P. M., at the Farmer Hall, Grayslake, according to C. W Wrny, Secretary of the Committee. This committee is composed of C. J. Wightman, C. W. Wray, M. C. Oben-

aut, Max Kohner and Willard Darrell. Auyone having special debts to be adjusted may get lo touch with this committee and it is their purpose to ondeavor to get the creditors and debtors into an agreement for settle

Farm Accounts Meeting.

J. C. Reuss and Mr. Bain of the the Town with the WBBM Air The Farm Management Department of the atro" is headed by Dell Coon and his University of Illinois, will be in the orchestra; Tommy Mack, star of the county on nexxt Saturday, January 25, in connection with Farm Account tens; the Three Byrens; Ted and Art work. Mr. Rouss will have charge of Miller; and from Colosime's comes the closing of old accounts, while Mr. the"Blend Venus" one of the most Buln will have charge of a achoel for opening new accounts. This school will be conducted from 9:00 to 12:00 A. M., in order that the work may be completed in time for the County Pure Milk Meeting in the afternoon,

The keeping of farm accounts is the hest way for farmers to find the leaks, ns well as the high prefit points, in their business and to better erganize their farming operations. The work is carried on in Lake county under the supervision of H. C. Gilkerson,

Farm Repairs School

H. C. Glikerson, Farm Advissr, has made arrangements with Ralph Hay of the Agricultural Engineering Department of the University of Illinois, to conduct a farm machinery repair school on Friday, February 7, te lastruct farmers on the latest methods of repairing farm machinery. Further information as to the place of meeting will be given out later

Cryptography la Old

Cryptography is of the greatest antiquity. Plutarch and Gellins tell of a method employed in Sparta for communicating with their generals abroad. The earliest system was the winding of a strip of parchment spirally upon a staff with the edges meeting. The mesange was then written along the line of foldture. The broken lines could only be read ofterward by rolling the parchment upon a coplicate staff in the possession of one who knew the precise size. There are a great many other cryptograms. The Jews made llus Caesar and Augustua made fre-

sculptors, and supplies water for Ath-French Frigate Shoel French Frigate Shoul is named for

a rock Island 60 yards long, 20 yards wide and 122 feet high. From a distance it resembles a frigate under sail.
